CROWN RACE FITTING TOOL

For fast and precise seating of the headset crown ring onto the fork crown
With integrated guide which centers the tool on the fork steerer tube
Suitable for: 1" | 1 1/8" | 1.5" | 1.8" crown rings
code 720382

Important!

The crown ring must sit exactly flat on the fork crown!
The tool's integrated guide prevents tilting.
The guide centres the impactor with the fork steerer.

max. possible steerer tube lengths:

1" = 340 mm
1 1/8" = 335 mm
1.5" = 315 mm

Use the impactor to knock the crown ring of the headset onto the fork crown.

First choose the appropriate size adapter sleeve, then use the impactor to knock the fork crown ring of the headset onto the fork crown. Make sure that the adapter sleeves fit accurately within the impactor tool to prevent the crown ring from jamming. The adapters have a chamfer on one side of the bore which allows you to push in crown rings with a sealing lip without damaging it. The guide integrated in the impact sleeve ensures exact centering on the steerer tube and ensures the crown ring seats perfectly flat without tilting.
